EDUCATION

University Of British Columbia   Expected Graduation: April 2025
Bachelor of Science, Computer Science   *Vancouver, BC*
- Coursework: Computation Structures, Software Design, Data Structures, Visualizing and Analyzing data
- Awards: BC-Excellence Scholarship, awarded to the top 50 high-school students in BC

TECHNICAL SKILLS

Programming Languages: Java, JavaScript(React Native), Python, C, HTML/CSS
Technologies and Tools: Git, Figma, Bootstrap, Asana, Jupyter, Notion

EXPERIENCE

UBC LaunchPad   September 2021 – Current
Software Developer   *Vancouver, BC*
- I work in a group of eight to build a mobile app that matches UBC students based on their interests and personality
- I am a full-stack developer, but I also work closely with the designers. My one-to-one matching idea shifted the main design of the app

Rona   March 2021 – August 2021
Sales Associate   *Vancouver, BC*
- Troubleshot and found solutions for customers' electrical and plumbing issues
- Worked with a dynamic team to give a vibrant and fun experience for each customer
- Monitored the sales floor, handled multiple customers at a time and collaborated with stock, sales, cash, and management teams to reach the team goals

Kids Innovative   June 2020 – August 2020
Programming Course Developer   *Vancouver, BC*
- Created a course to teach kids Python through interactive games
- Explained step-by-step thinking, conditionals, loops and functions
- Worked directly with the CEO and implemented all of her feedback in a timely manner

TECHNICAL PROJECTS

Meetable | *React Native, AWS Amplify, Node.js*
- Our goal is to have a product available in eight months for both Android and iOS users, so far we have the login and sign up page ready, but the rest is undergoing a redesign
- Using React Native for the front-end and AWS Amplify and Node.js for the back-end

Full-Stack | *HTML, CSS, JavaScript, Node.js*
- I built a front-end-focused website that uses different APIs to show information about some of my interests, such as Bitcoin and Ethereum price
- I developed a back-end-focused website that allows users to add a comment to a list of comments as well as edit or delete them; I used the uuid library to generate unique IDs for each comment
- I wrote a personal website where I introduced myself and explained more about my interests

Data Classifier | *R, JavaScript(React, Node.js), HTML, CSS*
- Building a web app to visualise a data-set and classify unknown values based on our recipe and models
- Using R and Jupyter to integrate the visualisation models and data analysis with the web
